COMPÉTENCES CLÉS

Software Project Management

- **Planning and tracking** : detailed project plans, milestone tracking, workload estimation, dependency management
- **Steering and reporting** : risk management, status reporting, escalation to management, steering committees
- **Delivery** : platform configuration to client needs, end-to-end testing, go-live, deployment, maintenance
- **Run and maintenance**: post go-live support, change request management, continuous improvement

AI for Delivery

- **AI workflows** : DIFY workflows in production for analysis, reporting, and documentation
- **Prompt and context engineering** : structuring prompts for complex tasks, calibrating outputs
- **Tools** : Claude and Claude Code at advanced practitioner level, DIFY

Client Relationship

- Requirements gathering, functional specifications, gap analysis
- Single point of contact for the client from requirements through final delivery and training
- Stakeholder coordination between business, medical, and technical teams
- User training and change management

Technical Skills

- **Backend**: Python, Node.js, REST APIs, PostgreSQL, MySQL
- **Frontend**: JavaScript/TypeScript, Angular, HTML5/CSS
- **ERP**: Odoo module development and end-to-end implementation
- **Tools**: Git, GitHub, GitLab, Postman, JIRA, Notion
- **Methods**: Agile/Scrum, Kanban, Waterfall, hybrid

Francine MADOH

Software Project Manager

Software project manager with four years of experience at the intersection of development and project management. I manage software delivery end to end, from requirements gathering through platform configuration, end-to-end testing, deployment, and client training. I use AI tools daily to accelerate planning, reporting, and documentation, and I speak the same language as development teams. Project coordination has been part of my work since my very first roles, even before my developer career.

EXPERIENCES

Technical Project Manager | CTO Assistant
From Nov. 2025 to Apr. 2026 Zetos (ESN) Paris

- Analyzed nearly 100 IT tenders and technical specifications: assessed feasibility, estimated workloads by role, made go/no-go decisions, and wrote the associated technical proposals
- Produced scoping and delivery artifacts on each file: scoping notes, gap analyses, specifications, test strategy, deployment plan, and migration plan
- Coordinated cross-functionally across the Administration, Sales, and Development departments and reported to management
- Designed and deployed three AI workflows in production on the DIFY platform to accelerate analysis, reporting, and documentation, cutting file processing time by roughly 50 per cent

***Tools**: DIFY, Claude Code, Google Workspace, Notion, Excel*

Technical Project Manager | Fullstack Developer
From Feb. 2024 to Feb. 2025 Omamori Cameroon
Main project Odoo payroll system with regulatory compliance:

- Scoped and led the delivery of an Odoo payroll platform for a client, from requirements to production, coordinating the development team as the business-technical interface
- Ran user acceptance testing, deployment, and the training of eight administrators, then handled post go-live support
- On a freelance assignment, led the configuration and production deployment of an Odoo freight management module

***Technologies**: Python, Odoo, TypeScript, Angular, PostgreSQL, MySQL, REST APIs*

Junior Project Manager | Fullstack Developer
From May 2021 to Feb. 2023 Y-note SA Cameroon
Digital transformation in the healthcare sector

- Coordinated and delivered the configuration of the Odoo oeHealth module for Doctafrica, a teleconsultation platform, from client requirements to production, and led the rollout of a medical appointment-booking platform
- Coordinated the development of a feedback module for the UserFees and OpenIMIS project, a health insurance management system, working between the client organization, medical teams, and developers, from specifications to deployment, Handled deployment on VPS servers and SQL Server, and wrote the end-user documentation

***Technologies**: Python, Odoo, JavaScript/TypeScript, Flutter, PostgreSQL, GitLab*

Assistant Project Manager | Research Officer
From Jun. 2020 to Oct. 2020 Megasoft SA Cameroon

- Supported the project manager on a national addressing project in Congo (urban observatory): planned stakeholder meetings, coordinated communication between parties, wrote meeting minutes, contributed to requirement specifications, and tracked progress with MS Project

***Tools:** MS Project, Office suite*

Education

Master in Project and Innovation Management
From Jan. 2025 to Jan. 2026 ILMIS Business School France

Fullstack Javascript Developer Nanodegree(Certification)
From Dec. 2022 to Feb. 2023 Udacity Remote

Frontend Web Developer Nanodegree (Certification)
From Apr. 2019 to Aug. 2019 Udacity Remote

Master in Mathematics Applied to Social Sciences
From Oct. 2013 to Dec. 2018 University of Yaoundé 2 Cameroon
